Prefab buildings

"We have got you covered"

Snoei

PREFAB BUILDINGS

About us

At Snoei, we understand that growth requires space. That is why our people have been investing in the development of flexible, affordable and sustainable system buildings since 1935. Whether you are looking for a temporary or permanent industrial shed, hangar, machine shed or workshop; at J. Snoei BV you will always find a system shed that seamlessly fits your needs.

The specialist in pre-fabricated steel buildings

- Own production on 7000 m2 in the Netherlands
- Worldwide delivery
- Short delivery times
- Range of over 50 standard building types
- Favourable pricing
- Own 3D-configurator

Dealers and international projects

Would you like to become a dealer, or do you need space for an international project? Then you've come to the right place. We work exclusively with dealers, or directly with the end-user in large international projects.

Our strength lies in the production of system buildings in kit form. Everything is "made in Holland" and comes straight from our own factory. That way we keep the production under our control and we can guarantee the quality of our buildings. Thanks to our years of experience, our specialised team and our unique machinery, we are capable of delivering a suitable solution for your ideas or those of your customers.

A good price-performance ratio, speed, and flexibility are what you can expect from us.

01
Snoei

We produce buildings based on a unique and reliable system.

02
Dealers

Dealers deliver the buildings to the end-users and carry out the assembly process.

02
Export

In large international projects we have direct contact with the end-user.

03
End-users

The end-users are provided with a suitable system solution.

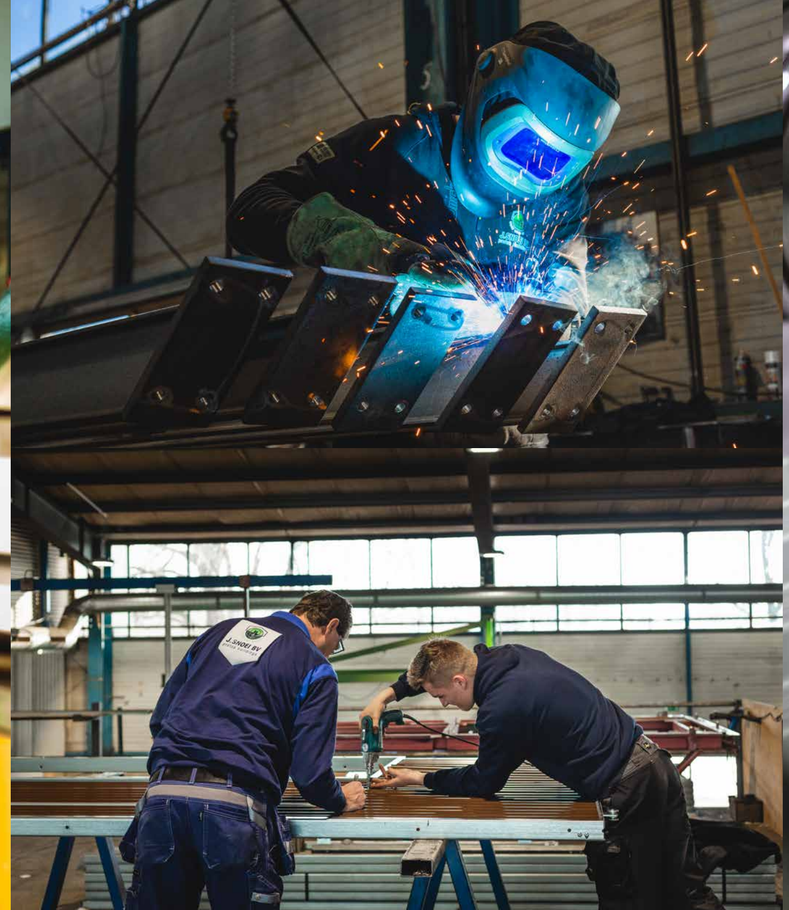

Snoei
PREFAB BUILDINGS

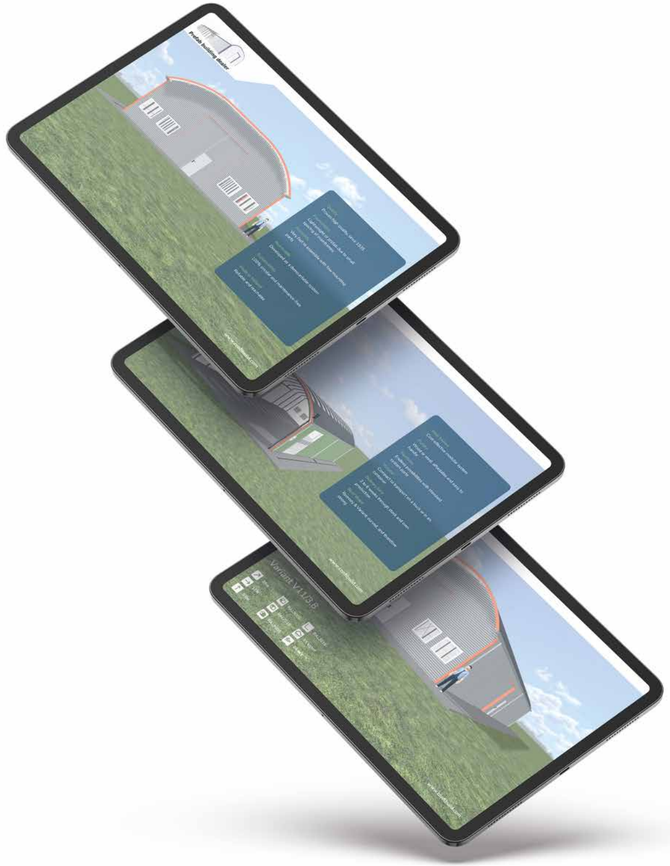

"We offer you the best solution in the form of a standard system or thoughtful customisation. And we give you the space you need either way!"

Own production in the Netherlands

ConfiBuild

3D building configurator

ConfiBuild makes it possible to put together a standard building as desired in six steps. This online tool helps dealers and end-users visualise the building they need and easily and quickly create a customised quotation. For all dealers, ConfiBuild is available with their own logo and a link for their website. It is user-friendly, with additional information and sample photos at each step. Once a customer has made a configuration of a building, the request goes directly to the dealer.

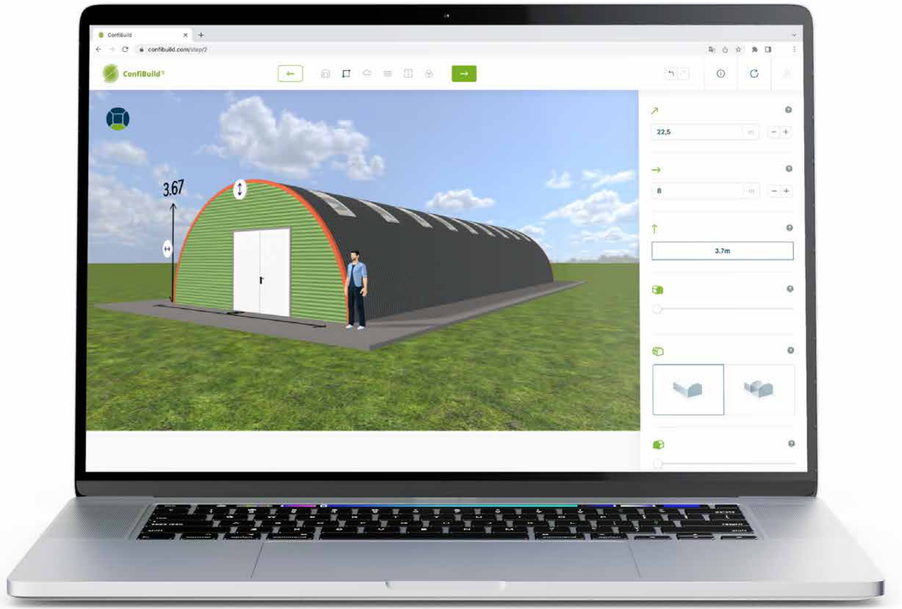

Advantages

- Simple design of standard buildings
- All requests in one view
- Freely definable margin
- 3D views of the buildings as pdf
- Automatic generation of quotations
- Free use for customers

Six steps to design a building

1. Type of building
2. Dimensions, gables and canopies
3. Snow and wind loads
4. Purlins, cladding and insulation
5. Doors, windows, translucent sheets and gutters
6. Colours

The unique features of prefab buildings

1 **Sustainability**
100% circular and maintenance-free

2 **Delivery time**
2 to 6 weeks

3 **Quality**
Proven quality since 1935

4 **Assembly**
Quick to assemble using just a few bolts

5 **Roof shape**
Arched for exceptional strength

6 **Wood Purlins**
Low-cost and easy to handle

7 **Structure**
Modular system

8 **Volume**
Compact to transport

9 **Flexibility**
Modular system for endless possibilities

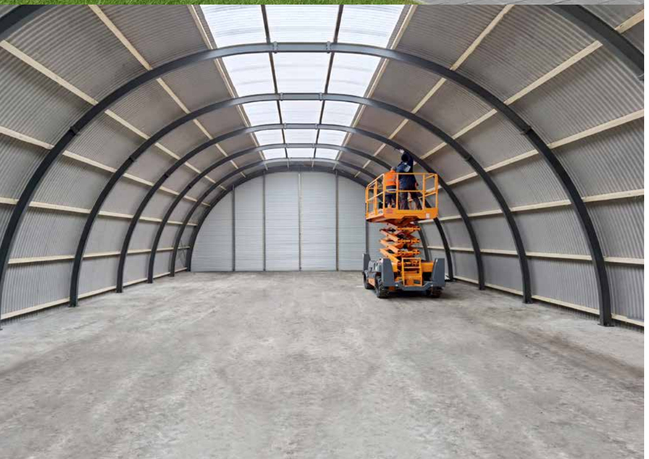

10 **Foundations**
Lightweight due to the small bay length

11 **Disassembly**
Developed as a demountable system

12 **Made in Holland**
Reliable and accessible

Romney

Round buildings

The ROMNEY is the well-known half-round building, named after one of its original manufacturers. The unique shape makes the building exceptionally strong, whilst the structure is quite light. Over the years we have further developed the ROMNEY according to the changing rules and regulations. Most types are available as multi-span, which makes it possible to connect multiple buildings and create even more space.

Properties

- The classic curved building
- Curved steel construction with purlins and steel cladding
- Width between 5,0 and 21,5 m free span
- 11 standard widths and heights
- Range from lightweight up to a snow load of 325 kg/m2

Advantages

- Extremely strong due to the rounded shape
- Unique, strong and relatively light construction
- Small number of different components
- Ideal for export; up to 600 m2 in a 20ft container
- Easy to insulate
- The most economical form to create space
- Numerous special versions available

Snoei
PREFAB BUILDINGS

Variant

System buildings

The VARIANT building offers flexibility to make optimal use of the space. Compared to the ROMNEY the VARIANT provides you with extra interior space, thanks to the structure with straight sidewalls. You can choose from a wide range with several features and options. Nearly all types are available as multi-span, which makes it possible to connect the buildings in order to create even more space.

Properties

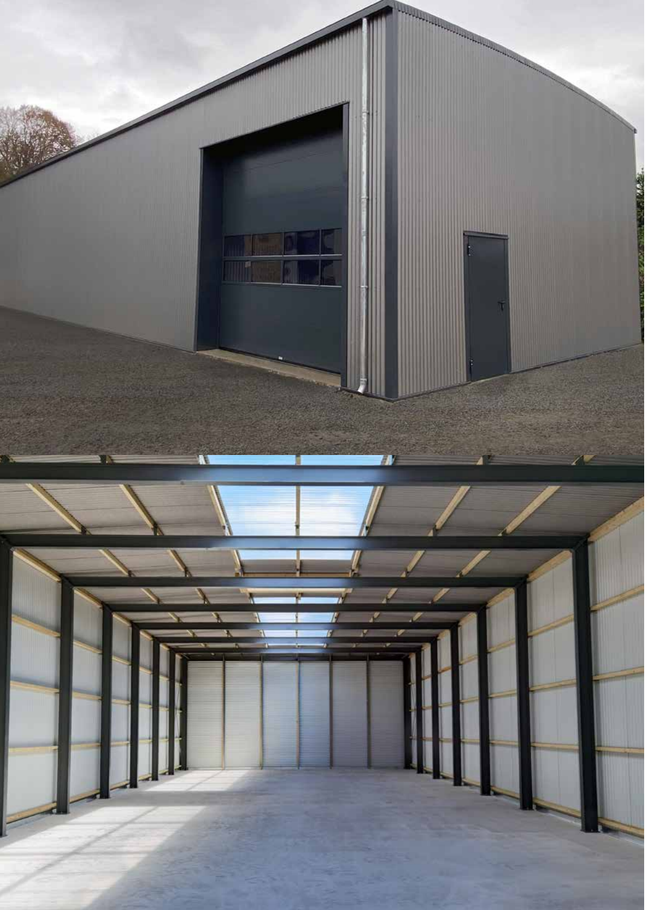

- Building with straight side walls and a curved roof
- Steel construction with purlins and steel cladding
- Width between 5,5 and 15,0 m free span
- Available in 16 different standard widths and heights
- Range from lightweight up to a snow load of 325 kg/m2

Advantages

- Very strong due to curved roof
- Ideal usable interior space
- Relatively light construction
- Standard windows and doors are easy to build in
- Competitive price, cost saving in assembly
- Ideal for export
- Numerous special versions available

Snoei
PREFAB BUILDINGS

Variant+

Small buildings

When compact space is needed the VARIANT+ offers the perfect solution. This compact building has straight side walls and a slightly curved roof. This shape allows you to make optimal use of the entire interior space. The building is available in various standard versions, with different heights and various doors.

Specificaties

- Steel construction with purlins and steel cladding
- Width between 3,0 and 10,0 m free span
- Different standard width and height dimensions
- Range from lightweight up to snow a load of 325 kg/m2
- Length unlimited extensible

Advantages

- Proven construction system
- Ideal for small spaces
- Alternative for buildings with flat roof
- Competitive price, cost saving in assembly
- Several derivative dimensions and custom made types possible

Jawini

Standard buildings

In the 60s, J. Snoei BV developed a unique pre-fabricated pitched roof building with the name JAWINI. This building with its straight side walls and pitched roof quickly became a resounding success. Obviously, the JAWINI has developed over the years; however, the original concept has remained unchanged. The latest generation JAWINI buildings are the result of years of experience and easily meet the latest European standards.

Properties

- The familiar roof design in a standard system
- Steel construction with purlins and steel cladding
- Width between 8,0 and 15,0 m free span
- Different standard width and height dimensions
- Range from lightweight up to a snow load of 325 kg/m2
- Length unlimited extensible

Advantages

- Light foundations possible
- Well known and consistent appearance
- Competitive price, cost saving in assembly
- Other sizes and designs available

Endless possibilities

Custom corrugated sheets from our own factory

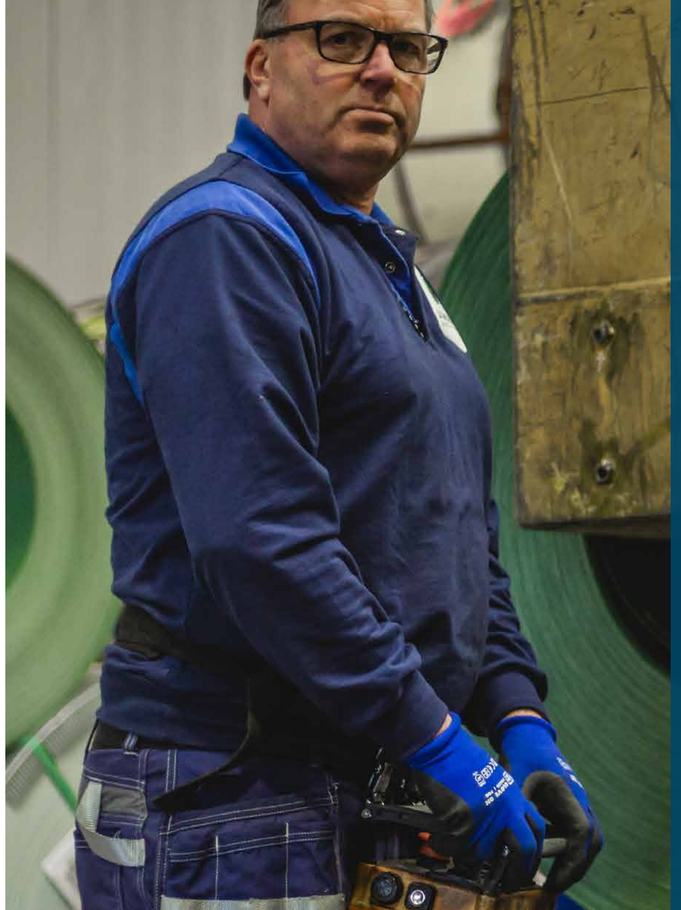

You've come to the right place if you need corrugated sheets. Various options such as the curved sheets, anti-condensation felt and perforated corrugated sheet are possible. By making double corrugated sheets with insulation in between, an insulated construction without thermal bridges and with very small transport volume is possible.

All our sheets are CE marked and meet the latest European standards. The corrugated sheets are produced in our own factory and therefore available at short notice and at competitive prices.

Colour palette

- **RAL 1015** Light ivory
- **RAL 3009** Oxide red
- **RAL 3016** Coral red
- **RAL 5010** Gentian blue
- **RAL 6009** Pine green
- **RAL 6011** Reseda green
- **RAL 7016** Anthracite grey
- **RAL 7035** Light grey
- **RAL 8014** Sepia brown
- **RAL 9002** Grey white
- **RAL 9005** Jet black
- **RAL 9006** White aluminium
- **RAL 9007** Grey aluminium

Technical specifications for corrugated sheets type 76/18

- Total sheet width approx. 830 mm
- Width after overlap approx. 760 mm
- Profile height 18 mm
- Custom length up to 7000 mm
- Curved corrugated sheet with minimum bend radius of approx. 3000 mm
- Distance of purlins up to 1,2 m

Galvanised steel corrugated sheet

- Thickness 0.56 mm
- Galvanised

Galvanised steel corrugated sheet with silicone polyester coating

- Thickness 0,56 mm
- With a zinc coating
- Available from stock in a variety of 13 RAL colours
- A-side with silicone polyester coating
- B-side with protective coating

Perforated steel corrugated sheets

- Thickness 0,56 mm
- For indoor use
- Especially for sound insulation
- Colour RAL 9002

Anti-condensation corrugated sheets

- As an option on all corrugated sheets
- Absorbs condensed water
- Prevents the forming of droplets due to condensation

Translucent corrugated sheets

- Available in polyester or polycarbonate
- Polyester: 85% light transmission
- Polycarbonate: 100% light transmission
- Sheet width: 910 mm
- Working width: 760 mm
- Polycarbonate: Fire class Bs1d0
- Standard lengths in stock

Other products

Angle pieces and barge boards

- Own production with fast delivery
- With protective film
- Galvanised or in 13 RAL colours

Purlins and foundation timber

- Various sizes in stock
- With CE marking
- Purlins in strength class C24
- Possibility to make a hole pattern

Roof gutters

- Steel side gutter, without gutter brackets, in our own design
- Available in 3 RAL colours: RAL 7016/7035/9006
- Galvanised gutters for multi-span buildings and accessories

Fixing material

- Cladding screws in stock in various types and colours
- Bolts and nuts for structural connections
- Foundation anchors and small parts in stock

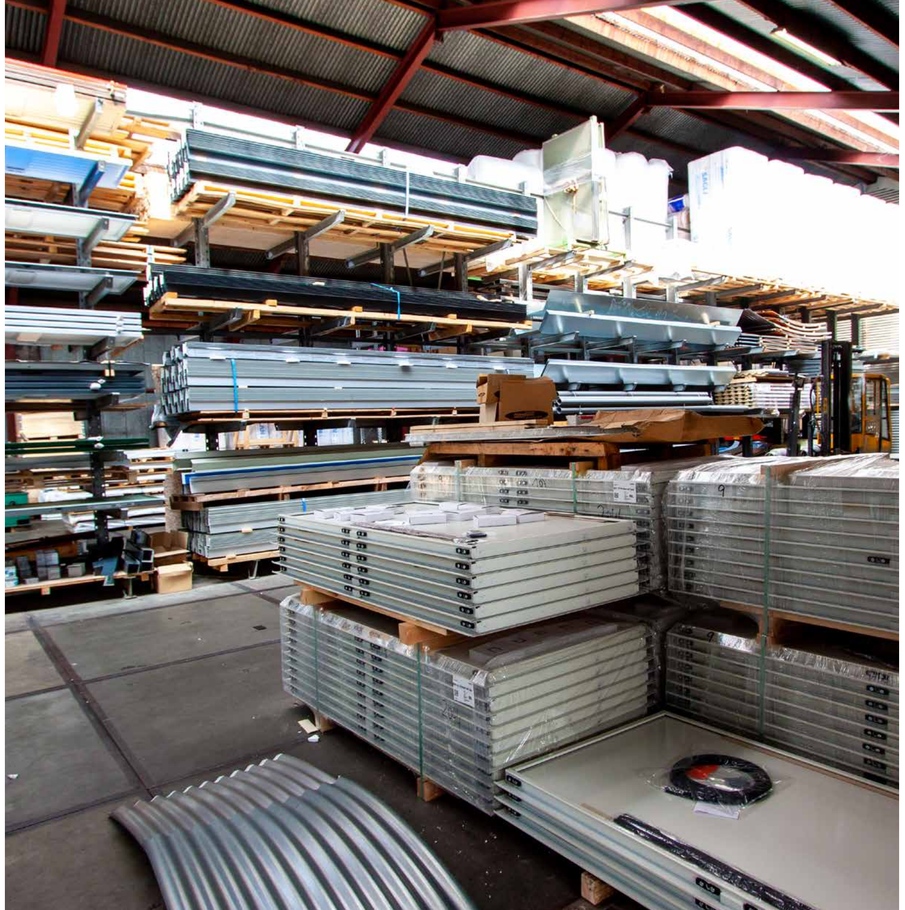

Trapezoidal profile cladding sheets

- Available in many colours and designs
- Also available in small quantities and adjustments
- Competitive prices

Sandwich panels

- Available as PIR panel in many colours and thicknesses
- Blind and visible mounting possible for wall panels
- Available as an option for buildings as a separate product

Snoei
PREFAB BUILDINGS

Other products

Sliding doors

- Our own system with galvanised steel frame
- Proven quality
- Unlimited width, height up to 5,0 m
- Many versions and options possible

Wicket doors

- Large number of standard steel doors in stock
- Also available in 13 colours and insulated
- Alternatively heavy insulated steel wicket door

Plastic windows

- Plastic, tilt & turn, white window 1,20 × 1,05 m with triple glazing
- Left and right-handed versions available
- Fits in all standard front and side walls of buildings

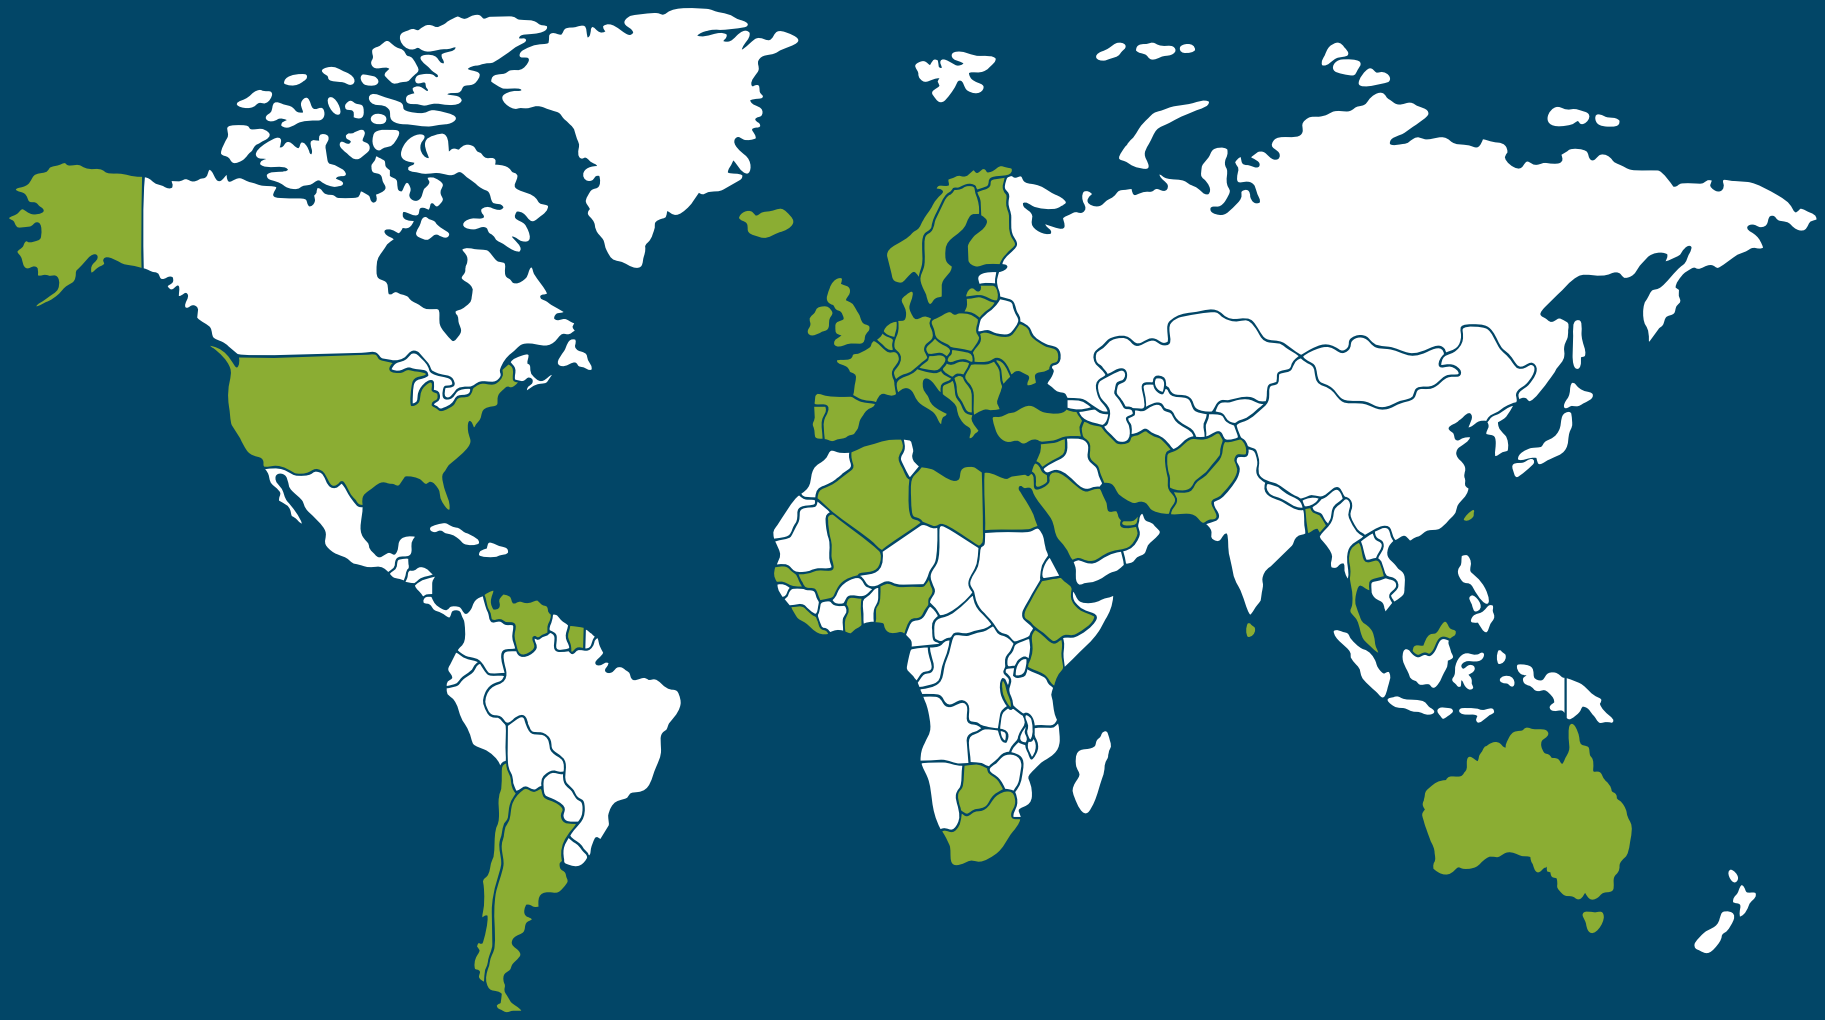

Mineral wool

- Different thicknesses of mineral wool in stock
- Favourable prices
- Suitable for various applications

Ventilators

- Wind-driven ventilator with opening ø200 mm
- Capacity 110 m³/h at wind speed 3 m/s
- For mounting on top of a curved roof
